

彭程 Peng Chen

Applying for Machine Learning Engineer Intern

📍 Taipei / Hsinchu, Taiwan 📞 0908-951-327 ✉ vicsonpeng@gmail.com 🌐 VicsonPeng

 Vicson Peng

Summary: Junior CS student at NYCU (GPA 4.18/4.30) with a strong foundation in Data Structures, Algorithms, and ML architectures. Experienced in bridging the gap between research and production by building scalable data pipelines (40k+ samples), internal API servers, and end-to-end ML workflows using Python and PyTorch. Highly adept at utilizing LLM-powered tools (ChatGPT, Copilot) to boost development productivity. Passionate about applying cutting-edge ML technologies to real-world systems.

CUMULATIVE GPA

4.18 /4.30

CS FUNDAMENTALS

Algo / DS (A+)

ENGLISH PROFICIENCY

TOEFL 99

CERTIFICATION

GPE Passed

CORE COMPETENCIES & VALUE

Key Qualifications	Evidence from Experience	Value Added to Enterprise Science Team
End-to-End ML Workflows	GazeCtrl Data Pipeline, Machine Learning (A+)	Solid grasp of core ML/DL concepts. Proven ability to operate robust ML job execution frameworks for training and inference.
API Servers & Infrastructure	Full-Stack DB Coursework, OS & Networking	Capable of building internal API servers and monitoring dashboards. Proficient in Linux and Docker, ready for cloud-native ecosystems (Kubernetes).
Algos & LLM-Boosted Dev	Algorithms (A+), Data Structures (A+)	Impact-driven mindset with strong problem-solving skills. Highly familiar with LLM tools (Copilot) to accelerate API development and ML experimentation.

PROJECT & SYSTEM DEVELOPMENT EXPERIENCE

GazeCtrl: End-to-End ML Workflow & Data Infrastructure

ML Engineer | Python, PyTorch, LLM APIs

- **Scalable Data Pipelines:** Built and optimized data infrastructure to process ~40,000 samples, managing multi-dimensional features (Mask, Depth) for high-performance model training and inference.
- **Research to Production:** Engineered robust job execution frameworks and integrated LLM APIs, turning theoretical research concepts (Depth-Aware Masking) into executable, user-facing features.

Internal API Servers & Dynamic Dashboard System

Full-Stack Developer | Course Project: Database & Web

- **API & System Architecture:** Developed internal API servers and backend logic to orchestrate complex database transactions and data retrieval.
- **Monitoring & Dashboards:** Designed complex relational database schemas and built dynamic dashboards, establishing a foundation for monitoring tools and data visualization.

CPLab ML Experimentation & Model Training

Research Trainee | PyTorch, Model Evaluation

- Collaborated closely with lab members to simplify ML experimentation workflows, assisting in training, inference, and post-processing tasks.
- Continuously evaluated state-of-the-art architectures through intensive paper reading, combining theoretical concepts with practical PyTorch implementations.

ACADEMIC LEARNING PATH

[Core ML & Data]

Machine Learning	A+
Intro to Data Science	A+
Intro to AI	A
Probability	A+

[Algo & Structures]

Algorithms	A+
Data Structures / OOP	A+
Linear Algebra	A+
Discrete Math	A+

[Systems & Infrastructure]

Operating Systems	A+
Database Systems	A+
Computer Networks	A
Digital Circuit Design	A+

SKILLS & LANGUAGES

Programming

Python, C/C++, SQL, Shell Scripting, JavaScript.

ML & Infrastructure

PyTorch, Data Pipelines, API Server Development, Linux (Ubuntu), Git, Docker.

Productivity Tools

GitHub Copilot, ChatGPT (LLM-powered development workflows).

Languages

English (TOEFL iBT: 99 - Proficient Professional Working), Mandarin (Native).
